Erdős, Paul

Combinatorial problems in geometry and number theory. (In English)

Relations between combinatorics and other parts of mathematics, Proc. Symp. Pure Math. Am. Math. Soc., Columbus, Ohio 1978, Proc. Symp. Pure Math. 34, 149-162 (1979).

[For the entire collection see Zbl 398.00002.]

The author summarizes the progress that has been made on various combinatorial problems in geometry and number theory.

J.W.Moon

Classification:

05A99 Classical combinatorial problems

51Exx Finite geometry and special incidence structures

11Axx Elementary number theory

00A07 Problem books
